

TCI SCS Silver Sponsored Automotive Logistics India Conference 2015 held at Gurgaon

Automotive LOGISTICS

India conference

Automotive Logistics is the only global print magazine dedicated to the strategy, management and movement of components, finished automobiles and service parts, from tier supplier to assembly plant and on to the dealer, and everything in between and also hosts the most important annual conferences for senior management within the automotive logistics sector on a global scale.

TCI Supply Chain Solutions (SCS), India's largest integrated multimodal logistics and supply chain solutions provider participated in the Automotive Logistics India Conference 2015 held from 8th-10th December, 2015 at The Leela, Gurgaon. TCI SCS was the silver sponsor for the event and also had a stall. Mr. Jasjit Sethi, CEO, TCI SCS along with Mr. Sumit Kumar, VP & North Regional Head, TCI SCS participated as the speakers at the event wherein Jasjit Sethi spoke on the **"The evolution of the "Smart Factory of the world"** and Sumit Kumar covered the **"Opportunities in Multimodal Network"**.

Mr. Jasjit Sethi pointed out that the carmakers' network across the vast country had to be taken into account, both in terms of dealerships and the distribution of spare parts.

According to Mr. Sethi, "When you build up infrastructure, you put up tolls – that will also raise costs. New regulations for car carrier size will also make them small and safer, but that will drive up costs. Soon we will also have Euro 4 truck standards, which are also more expensive."
